However, the ability to limit an app to a specific country is not entirely accurate. From right to left, the figure shows a diagnostic analysis in which, given a set of desired PMESII effects in the operational domain, the same system of integrated behavior models is used to identify the candidate sets of DIME actions that might be applied to achieve those desired effects. But I think that has its own charm. Interface Incompatibility The first problem shown in Figure in the top row concerns inter- face incompatibility between two models that either already exist or are being developed independently. You might say -- and Lodsys is certainly hoping that I'll say -- "0. Validation Issues Specific to Individual Modeling Approaches In this section we review the validation challenges and approaches that are specific to various modeling approaches used for IOS models. However, the criteria for featuring apps are unclear. How would I cope? In particular, prediction is important to action.
