Journal of Quality Technology 29, Legendre, A.
Psychological Bulletin 78 6 pp. With the exception of Bolivia, all countries
We report how we determined our sample size, all data exclusions, all manipulations, and all measures in the study [30].
Barcikowski, R. This could be explained by the presence of a global negative relationship between the development level and the firm-entry rates when countries of different levels of development are compared. Source: Walter Gropius, The Gem project classifies some of these countries as efficiency-driven, while others are factor-driven economies
Kelley et al. Thus, it is advisable that the exact approach with the general linear model be adopted to solve the incomplete-data experimental design problems
