Yet, although beauty was classical education's central point of focus, it was by no means its only objective. Nonetheless, German specialised research and education enjoyed a positive reputation in England in the late 19th century. This is a preview of subscription content, log in to check access. The Practical Imagination Lindenfeld argues that these sciences of state developed a technique of deliberation on practical issues such as tax policy and welfare, that serves as a model for contemporary administrations. Also remove everything in this list from your library. Lindenfeld argues that these sciences of state developed a technique of deli K.
