Conversely, both of the later periods had more of the optically efficient medium-sized particles 0. Shuttle crews have been photographing the mountain at every opportunity, to add documentation to unmanned-satellite, aerial, and ground-based observations of changes.

Tambora, a volcano on an Indonesian island, first stirred and then exploded. I think Pinatubo caused global cooling. The heat source of the present hydrothermal system is provided by a cooling intrusive body, mapped as a gravity high, associated with the Mt. Card 14 October Moderate steam emissions from crater. There remain many uncertainties in the emission and oxidation of isoprene which may affect the exact size of this effect, but its magnitude is large enough that it should remain important.
