Regional geography is concerned with the description of the unique characteristics of a particular region such as its natural or human elements; the main aim is to understand, or define the uniqueness, or character of a particular region that consists of natural as well as human elements. Based on current evidence it is possible that no more than people inhabited the site during Phase 1.

During my excavations we cleaned a yellow floor which had many burnt features. It may have resulted from a single cooking event in which a huge seafood banquet was offered. Mountain ranges are formed by a variety of geological processes, but most of the significant ones on Earth are the result of plate tectonics. Esteban Naveda; as councilor, Mr.

Also a single case of a fastamped motif has been identified on a neckless olla. Both countries consider this action as a victory.
